

To whom it may concern:

Our company, S.C. Wright Construction, Inc., has utilized the services of Tony Barnaba's Greenridge Landscaping company for over a decade. Our company demands a high level of performance from our employees as well as our vendors and Mr. Barnaba has not disappointed.

His company is excellent at what you would expect regarding landscape design/implementation, installation and repair of irrigations systems, tree maintenance and trimming etc. but he has also professionally handled everything we have sent his way. And if, on the rare occasion his crew doesn't have the expertise required, he knows who does and is not afraid to bring that expertise in to get the job done right.

In fact, the property our building rests on has a very steep back slope that has to be 75 to 80 degrees from horizontal that has actually required his workers to be safety strapped to trees to perform their work.

We all know that there are other companies out there that can do what Tony does. For us, what makes Tony stand out is that he has great communication skills, and by that we mean he is always available, if you leave a message he calls you back or emails right away. He is proactive, keeps you in the "loop", lets you know well in advance if he will be out of town and is very responsive in emergencies.

We have every confidence in Tony and his team.

Best Regards,

Kim V. Wright, Chief Financial Officer
S.C. Wright Construction, Inc.
